Ultimate Superfoods products are in their 100% RAW form. If an item has a RAW label they are RAW. We believe in sourcing and eating only foods grown in the most natural way possible; free from pesticides and chemicals, free from genetic modification and hybridization, and free from the perversions of the industrial food chain. Food harvested naturally by the very people who have been doing so for generations; practicing sustainable methods and growing only native crops that has developed with the people and the land for centuries. We believe in utilizing only the barest of processes to prepare our food for market.

Sincerely,

Dennis J. Werner
